

THE WEEKLY CALL

TAX COLLECTIONS EXCEPTIONALLY GOOD THIS YEAR

Present at the last town council meeting held in the town office were Mayor T. D. Purcell, Councillors P. Deshayes, W. E. Thompson, D. McDonald and J. A. Menard.

The work to be done at the nuisance ground was left in abeyance until Mr. Bogie had estimated what he could do the work for.

By-law No. 289 was introduced. This is a by-law to authorize the sale of lots 14-15 in Block E. The by-law was passed.

It was reported to the council that in a number of places the roof of the community hall still leaked, and it should be repaired in order to prevent the ceiling being spoiled. An order subject to the approval of the council had been given for the necessary material. It was estimated that the material and labor would cost approximately \$150. The council decided to authorize the purchase of the two drums of semi-plastic cement, 10 pounds of heavy plastic cement together with the necessary brushes for the Community Hall roof.

The statement of receipts and expenditures for the month of June was presented and read. The statement showed the collection of municipal and school taxes for the month of June, the end of the disbursements of \$9,200.17.

Mr. Superintendent appeared before the council in connection with the rental charge for the use of the hall for the dance on the night of June 18 held by the hockey club. Mr. Superintendent explained that on account of weather conditions the dance itself had been cancelled, but it was not possible to cancel the dance arrangements and consequently they had barely made expenses and asked that a reduction in the rental charge for the hall be granted. The matter was given considerable discussion. It was suggested that in view of the unfavorable conditions that prevailed at the time the hockey club had granted a reduction in the hall rental charge.

A general discussion took place in connection with the conditioning of the streets. The matter was left in the hands of the public works committee.

TO COUNT CANADA'S WILD DUCKS

During this week an organized army will stalk up on the banks of wild ducks, across Manitoba, Saskatchewan and Alberta. They will carry guns and decoys; but pads of tally sheets and sharp pencils. The objective is not a "bag" of birds, but an accurate census of the wild duck population in each western neighborhood.

It is a volunteer army, organized by Ducks Unlimited (Canada) and known as "Ducks Unlimited Keen-men." Co-operating Keen-men will camp on observations and record essential facts covering the ducks in their neighborhoods. Some Keen-men can devote only a few hours to the work; others will be on the job for days. The sum total of their work will be a complete census of the wild duck population of the farm areas of western Canada.

This is the second time in history that a census of wild ducks has been taken on North America's great breeding grounds—in Western Canada. The first census was in 1935. It provided facts which led to the establishment of Ducks Unlimited. This 1938 census should yield facts required for further action in the restoration work launched by Ducks Unlimited as an important part of the vast work of rebuilding the west.

Hundreds of farmers, hunters and conservationists have volunteered as Ducks Unlimited Keen-men. In Saskatchewan and Alberta, municipal secretary-treasurers are acting as chief Keen-men for their municipalities. Fish and game organizations are checking out the waters. Provincial departments are co-operating with the full strength of their officials and fieldmen. All in all, a vast army is being organized.

More census workers are needed to get the facts in every neighborhood. Volunteers are invited to contact their municipal secretary—and tell him what sections they can cover

News Items of Local Interest

Adj. and Mrs. J. Sutherland and family left last week for a holiday at points west.

Miss V. Taylor has been spending the past week in Calgary visiting her sister and friends.

Mr. and Mrs. Wm. Halstead and family left Friday for the Pacific coast. They expect to be away for about three weeks.

All who are interested in the cemetery are invited to meet at the home of Mrs. McConnell's next Monday afternoon at 3 o'clock to discuss ways and means to beautify the cemetery with trees and flowers.

Charles McKay of Cammington Ont., is at present visiting his cousin Elliot and Campbell Evans Charley, who is a bandman, is having a great time with the local band boys practicing most of the day.

Monday evening about 11:40 o'clock the town was visited by a heavy downpour of rain that lasted for only a few minutes. So fast did the rain fall that within a minute the water was rushing down the streets in torrents.

About the only casualty among the Gleichens contestants who entered of the stampede was Jack Mertens, who is nursing several broken ribs, which he received when his chuck wagon was wrecked. Jack has tough luck almost every year in the chuck wagon. Jack is armed with complete facts and information. Each will count ducks and hoods; recording numbers and locations. Accurate reports are more useful than any larger number of returns based on guess work. Complete results will be published and copies sent each co-operator.

The 1935 census recorded some 1.1 million ducks on 750,000 square miles of land and water. Over 80 per cent of the ducks were on the border to Great Slave Lake—indicating, that this year, duck population in water levels are high; in the south lower in the north.

Authorities assert that sans restoration and efficient management: caribou, moose, and wildlife population is in a few years. The work that must be done to put them in the air is vital in rebuilding the west. Therefore, all who are sincerely interested in rebuilding the west, are urged to enlist in this work.

Hikers Prepare for Rockies' Sky-Line Trails

INVADE the domain of the mountain gods, adventure-lovers, Canadian and Americans will tramp the Sky-Line Trail in the Yoho Valley district of the Canadian Rockies this summer from August 5 to 8. The Sky-Line Trail is one of the Canadian Rockies' most popular trails. The only qualifications are a love of beauty, a sturdy pair of boots, and the will to leave the main roads for the undiscovered chambers of the back country.

Indications are that a gay band of adventurers will invade the beautiful Yoho Valley this summer from Banff Springs Hotel, Chateau Lake Louise and the several alpine chalets and bungalows camps in the Canadian Rockies. From camp to camp, the Sky-Line Trail winds its way between Yoho Lodge and Emerald Lake north of the Canadian Pacific Railway, the high line, visit the fossil beds on the slopes of Mount Burgess, inspect the stony moraine of the Yoho Glacier and pick flowers in the meadows of the bird's nest valley of Little Yoho Valley. The district has much to offer. The hikers will have opportunities to

wagon races. This year he wrecked his outfit on the back stretch of a race track and last year he wrecked his wagon on the infield while waiting up his horses before the start the race. Jack, no doubt, will join the races next year and here's hoping he will bring home the bacon.

The boys of the 22nd Battery got away Thursday evening in a bus which they packed to the roof. There were over thirty in the bus which took them north to board a Canadian National train bound for Camp Shilo, Man. They expect to return home this week end by the C.P.R.

During the past week the town has been quiet due to many from town and district attending the Calgary show. The old timers Messrs. Armstrong and Griesbach evidently had a good time in the city, at least Armstrong said so over the radio. Practically all the Indians have returned home and judging by their looks were well fed.

Jas. Moye who has resided of Even-Edwards Home for the past few months died Saturday afternoon. Deceased was born in the United States and some twenty years ago came to Gleichens and farmed for several years north of town. Selling out left the district. Of late years he had been living in Calgary and two months ago indicated that he was unable to work owing to advanced age took up residence at the home. Funeral services were held Monday afternoon with Rev. J. N. Wilkinson of the United Church and Mr. Walker of the Salvation Army officiating. Burial was made in Even-Edwards cemetery.

Few modern production jobs necessitate the care and attention that go into the manufacture of a toy, for often telling in shadowy silhouette a story that may mean life or death, only the most perfect film, free of every blemish, can be relied upon. The two great elements in the successful completion of the product are light and dust. Intrusion of either one of these normally omnipresent phenomena at certain vulnerable stages of manufacture would prove ruinous to the product and extraordinary precautions are taken to keep them out. All white light is cut off from the three of four major phases of film making; thus, almost three quarters of the work is smothered in gloom so that in the inside a motion picture theatre, where the machinery looms as vague shapes

THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan"

"I sure will know this fall which of the new varieties of wheat is best for my farm," said a good friend to me a few days ago. "How will you know that?" I asked him. "Well," he said, "I've seen two acres to Thatcher, Bonown, Apex, Reward and Red Bobs, and I'll compare the yields of each with my main crop of Marquis. Then next year I'll sow the seed on a larger acreage from whichever of the two acres proves to be the best."

"That's a fine experiment," I answered him, "but don't go for goodness sake use next year any of the seed from those two acre plots, for you'll find it very difficult, if not impossible, to harvest, thresh and to bin all those different varieties and not to get them badly mixed."

"From my own experience in seed growing, and from observing the work of hundreds of our best seed growers," I said, "I advise you to haul to the elevator the grain from all those two acre plots, and then next winter to purchase some good pure registered or certified seed of the variety you finally choose. Sow this good seed on clean land and then you will have a real start with the variety you like."

"Mixtures of varieties," I told my friend, "are certainly one of the commonest causes of low grades, hence a serious yunmyel SEHT blake of serious money losses to farmers."

Following factors have tended to raise prices: Heat damages spring crops in Russia and Bulgaria. North America's soil increases. Argentine corn still making below normal progress. United Kingdom buys large quantity of Rumanian wheat. Active European demand for American corn. Flax stocks afloat for Europe are small.

Following factors have tended to lower prices: Russia and Rumania offering wheat more freely. Rumanian's spontaneous export. Heavy Indian autumn food grain crops have good start. French wheat estimates increased. Wheat crop in Turkey expected to exceed 1937 crop. U. S. government estimate wheat crop July first at 967 million. Prairie moisture conditions improve.

And the white coated workers perform mysterious tasks with unerring accuracy. Elsewhere in the plant only super-conditioned air, purer than that into which Mr. Everest breathes its peak, is allowed to intrude, while a non-stop janitor service keeps the areas free from dust.

EAST OR WEST

Sometimes better prices may be obtained for your grain by shipping it to Vancouver, sometimes by shipping it to Port Arthur. This Farmers' Company has a terminal elevator at each of these Ports. That is one of the many reasons why it is able to give you the best possible service in handling your grain.

MADE IN CANADA

Radio—A Problem

While criticism is the lot of the Canadian Broadcasting Corporation from all sources and, possibly, some of it is justified, there cannot but be some feeling of sympathy for the members of an organization whose "customers" embrace such a wide range of viewpoint and taste as the Canadian radio fans.

Those who take the time to secure all the facts and data available on the subject—and that in itself is no light task—cannot help but be impressed with the belief that the C.B.C. is in a tight corner if it attempts to achieve the impossible, and that is, to please everybody.

In no single home in this country is it possible to secure unanimity of opinion on the type of program that is acceptable to the listeners, to touch only one of the many problems that face the Commission. How much more difficult then, must it be, to satisfy a majority in a community, or the province or the nation. Even if it were possible to ascertain with any degree of certitude the desires of a majority in a local community, it does not by any means follow that a similar verdict would be given by a majority in another community, nor that the tastes and preferences of the majority in different provinces of the Dominion and possibly between east and west.

Yet the Canadian Broadcasting Corporation is expected to give all the people what they want in the way of music, entertainment and education over the air.

Guiding Principles

Under such conditions about all the C.B.C. can be expected to do is to lay down certain fundamental principles for the guidance of its officials and adhere as closely as possible to these tenets, at least until popular clamor shows that they are on the wrong track.

There is one policy, however, which in the interests of the development of Canadian arts, should not be slighted, and that is the maximum use of Canadian local and national talent wherever it can be unearthed or can be encouraged and developed.

There is reason to believe, judging from comments made by adjudicators who have recently been placing awards in the provincial musical festivals in the western provinces, that there is much talent of a very high order which is being allowed to go to waste, or, if not actually being wasted, is not being made generally available to those who appreciate music to anything like the extent it should be, or could be. It is being prosecuted a vigorous search for good material Canadian origin.

A Major Objective

When the Canadian Broadcasting Corporation was set up it was announced that one of its objectives would be to develop Canadian talent and, in fact, this was one of the strongest recommendations of the Aird Commission's report in 1929 when the Commission said:

"In our survey of conditions in Canada we have heard the present radio situation discussed from many angles with considerable diversity of opinion. There has, however, been unanimity on one fundamental question—Canadian radio listeners want Canadian broadcasting. At present the majority of programs heard are from sources outside of Canada. It has been emphasized to us that the continued reception of these has a tendency to mould the minds of the people to the home to ideals and opinions that are not Canadian. In a country of the vast geographical dimensions of Canada broadcasting will undoubtedly become a great force in fostering a national spirit and interpreting national life."

While the present radio governing body in Canada set out with this ideal in mind, unfortunately there has been a recent recession from this principle, with announcements that still more time in the future will be devoted to programs of foreign origin—meaning, of course, from United States sources. Inability to finance broadcasting of all-Canadian programs has been given as the reason for this departure from the original objective.

This recession from the Canadian ideal is very regrettable and it is to be hoped that means will soon be found for returning to the principles set forth in the Aird Commission report and promulgated when the Canadian Broadcasting Corporation was given charge of "the ether."

Abolish Private Stations?

Commenting on the situation the Labor Review in a recent issue went so far as to suggest that privately-owned stations should be abolished as a means to this end.

"If we are to have a thoroughly Canadian broadcasting service," said the Labor Review, "the privately-owned stations must be abolished. Maintained as they are by advertising, broadcasting in Canada cannot be freed from commercial appeals while the private stations remain. And since much of the paid broadcast comes from foreign sources the continuance of the private stations militates against the fulfilment of the purpose for which the national radio service was established."

The same authority contends that "the only valid reason for the Corporation's acceptance of the foreign advertising program is the need for revenue, a need aggravated by the unsmooth competition between a state enterprise and private business."

Whether or not this is a correct diagnosis and solution of the problem, certainly it is a matter of grave concern to the country as a whole and in which one should receive the most careful consideration.

Flah have sensations of discomfort, but their pain nerves are not developed to as great a degree as in higher forms of life. For this reason, they suffer very slightly when hooked or speared.

According to any authority, the 10 most important trees in the world are, in the order named: date palm, fig, olive, palm, almond, apple, fig, mulberry, pine, lemon, cinnamon and rubber.

Two pairs of cuffs for each pair of trousers—one pair attachable for rainy weather—is the patented invention of a tailoring house at Rochester, N.Y.

Opinion Of Sir Wilfrid

Why More Able Men Entered Parliament In Early Days

When the writer was a member of the Press Gallery at Ottawa, says A. R. Ford in the London Free Press, we recall asking Sir Wilfrid Laurier at one time whether it was true that the caliber of the members in the early parliaments were superior to those of that day.

Sir Wilfrid Laurier replied, "Yes." We asked him "Why?" Here is his reply.

"In the early days of Canada business was on a small scale. The rewards of commerce were comparatively meagre. The chief ideal of an ambitious youth lay in politics and law. The ablest men of the country sought a political career. To-day, on the other hand, with the development of big business the opportunities in commerce and finance are such, the rewards are so great, that few young men want to risk a political career with the uncertainties of public life."

Alberta Co-Operatives

Had Best Year Since Inception Seven Years Ago

After issuing or providing for dividends totalling \$17,882, the United Farmers of Alberta, Central Co-operative Association had a net profit of \$8,640 for the year ending March 31, 1938, it was reported following the annual meeting at Calgary. It was the best year since inception of the association seven years ago.

The total volume of business handled has not been reported as yet, commissions of the association which act as purchasing agents for their points amounted to \$46,649 for the year.

The Co-operative Association, catering to U.F.A. members and patrons, operates its own wholesale and retail oil and fuel outlets and handles such farm staples as binder twine, coal and fence posts.

Interested In His Work

Eighty-Four-Year-Old Man Kept Job Until He Died

Eighty-four-year-old Charles Mulberry, of Walworth, worked until the day he died.

His employer said: "His present place would have been in a comfortable armchair by the fireside or in the garden."

Until heart failure ended his chapter he worked every day as an estate agent's clerk.

He was a proud man; proud of his appearance; he always insisted on wearing a stiff collar and a white shirt.

After fifty-six years with one firm he found another job when the firm closed down.

Charles Mulberry had something of a hobby—a little interest in his job—London Sunday Dispatch.

Ends Back-To-Nature Test

Half-Breed Indian Guide Lived On Game And Herbs

Alton (Hence Spoke) Draper, 58-year-old half-breed Indian guide, has ended a 30-day "back to nature" test in the Adirondack woods.

In latticed clothing, he walked in to his home at Star Lake, New York, to end his sojourn, which was planned to show the world that mother nature is still the friend of man who was in the days of his ancestors." He said, however, that he could not have "held out much longer."

Draper entered the woods April 3, with only his clothing and a hunting knife. During the month he prospected for molybdenum, and lived on mukarat, porcupine, fish and herbs.

A woman correspondent wrote: "All I have to say to my husband is 'Are you going to move the lawn again?' And then he'll say 'Yes, or do you want, of course.'"

The really fascinating woman is the one who can always convince us that she knows less than we do.

National Defence

Position Of Canada On Question Of Armaments

The government desires to create in Canada as far as possible, a national self-sufficiency in armaments against the emergency of war, officials at Ottawa state. However, this does not mean beginning of an extensive armament industry to supply Canada's requirements.

Beyond providing for the current needs of the defence forces, the government does not propose to embark on any large expenditures in armaments, it is said. So far as possible in Canada of munitions orders for the British government is concerned, all the information possessed by the defence department relating to the capacity and character of this country's heavy industries has always been available to the war office.

At present three Canadian concerns are understood to be working on British contracts—National Steel Co., Hamilton, manufacturing a comparatively small quantity of 3.5-inch shell casings; the John T. Hepburn Co., Toronto, engaged in the manufacture of shell-making machines, and the John Inglis Company, London, Ontario, manufacturing an order for 5,000 Bren guns.

Coincident with the British contract with the Inglis Company is one for Canadian government involving 7,000 of these light machine guns. That, however, will likely be spread over a period of three years. The contracts which resulted in the John Inglis Company being constituted the first manufacturer of the Bren gun in Canada were designed to achieve economic production, with a general saving to all concerned.

Highway To Alaska

Project Is Favored Of Building Road Through Canada

Harold Ickes, secretary of the Interior at Washington, said that conferences with British Columbia authorities convinced him of the soundness of a plan to build an international highway from Seattle through Canada to Fairbanks.

Ickes said he had "revised the whole problem" with Premier T. D. Pattullo of British Columbia and his aides, who came to Washington. "We discussed the matter of financing the project and the worth of the road as an instrument in opening Alaska and British Columbia and the Yukon territory to further settlement," Ickes said.

Pattullo, the secretary said, suggested the United States build \$15,000,000 to British Columbia and in exchange the province's share of the project. More than 1,000 miles of new road would have to be constructed in Canada.

At his press conference, Ickes said he could see no particular advantage in our barriers to arranging an international loan although it might be necessary to obtain some enabling legislation.

SELECTED RECIPES

PINEAPPLE UPSIDE DOWN CAKE (One Egg)

1 1/2 cups sifted Swans Down Cake Flour

1 1/2 teaspoons Caking Baking Powder

1/2 teaspoon salt

1 cup granulated sugar

1 egg, well beaten

1 cup milk

1/2 cup butter

1/2 cup brown sugar, firmly packed

1 slice pineapple, cut in wedges

Sift flour once, measure, add baking powder, salt, sugar, and sift together three times. Add butter.

Combine egg, milk, and vanilla. Add to dry mixture, stirring with flour is dampened; then beat vigorously one minute.

Melt four tablespoons butter in a x x x 2-inch pan or 8-inch skillet over low flame. Add batter and cook and stir until thoroughly melted. On this arrange pineapple wedges, and sprinkle nuts over top.

Turn batter out on contents of pan. Bake in moderate oven (350 degrees F.) 50 minutes, or until done. Loosen cake from sides of pan with spatula. Turn upside down on dish with pineapple on top. Garnish with whipped cream, if desired.

Other fruits may be substituted for pineapple and nuts in this recipe and may be arranged on butter-sugar mixture in the pan. These fruits include cooked prunes or apricots, sliced fresh cherries, seed, or sliced apples.

Three swing bands will provide plenty of noise at the Canadian National Exhibition this year. For those who still appreciate music, the Royal Artillery Band of England will be located at the opposite end of the grounds.

Out of 10,000 different grasses—including corn and other grains—over 1,300 are native to the United States.

THE NATIONAL WALL COATING

An Expensive Rug

New York's Waldorf-Astoria Has One Costing Over \$120,000

The Waldorf-Astoria had a new rug in its Park Avenue lobby one evening recently and we happened to be in on it. It was probably as profane a night as a hotel has ever seen. We will quickly jot down the statistics we gathered. The rug is 48 feet 11 inches by 48 feet 11, and therefore measures 2,385 square feet. It has a pile a little over an inch thick, and sixty-nine shades of yarn are sprinkled into its fifteen million tufts. It took sixteen weavers eight months to make. Only the Mohawk Carpet Mills, W. & J. Stans, and the Waldorf Hotel who expensive it was, but we got it from a man in the rug trade that the monster must have cost about \$60 a square yard, which would come to \$120,700. It isn't the biggest rug in the country; the biggest is of 3,940 square feet and is in the Nebraska State Capitol, but that is a monochromatic and consequently less exciting to rug people. The Waldorf's is bigger than the rug in the Royal Theatre, from which 12,000 pieces of chewing gum are removed yearly. The Waldorf anticipates no trouble along these lines.—New Yorker.

Evoy Of Autograph Hunter

Only Really Famous Sign Visitors' Book At Niagara Falls

A book of signatures which would make the most critical autograph hunter green with envy is tucked away in the safe of the state reservation police at Niagara Falls, N.Y.

It contains the signatures of Queen Marie of Rumania, the former Prince of Wales (now Duke of Windsor), King Leopold of Belgium, William Jennings Bryan; Presidents William McKinley, Theodore Roosevelt, William McKinley Taft and Franklin D. Roosevelt; Will Rogers and Sarah Bernhardt.

Chief Tracy C. Levee and his reservation police have all these and a great many more in their big leather-bound book for the signatures of "distinguished persons."

Almost a quarter of a century ago the park commission asked the police to collect the autographs of "distinguished" persons who visit Niagara Falls. The book is almost as large as it was 25 years ago, because the force is probably the most "choosy" autograph-hunting group in the world.

Gold Bullion

Report States France Is Shipping Gold To Canada

Two equal shipments of gold with a total value of \$5,000,000 (\$25,000,000) have been arranged for France for Canada, the London News-Chronicle says.

The shipments are to be made by the British authorities and represent gold earmarked in Paris for the account of the British exchange equalization fund.

The News-Chronicle advances two possible explanations of the transaction. It may represent sales of gold bullion to the Bank of Canada or the British authorities may think it desirable to accumulate, for their account, a reserve of gold in Canada.

Two doctors have been added to the staff of a Paris hotel. On being assured that no reflection on his ability was intended, the chef agreed to remain.

IRON-LOOK

The Coleman Way

Within ten days, spread over bushes in a London suburban area of Kent, thousands of butterflies of many different species are bred for collectors and scientists.

The average man sleeps more soundly during the first two hours of his nightly repose than during the rest of his summer period, according to the results of tests.

CONTRACT AWARDED

When a corporation wishes to build a factory . . . When a town constructs new cement sidewalks . . . whenever large works are planned, the first step is almost invariably a request for bids on the work. This practice of competitive bidding has saved millions of dollars. It assures the town or corporation of getting the best value for every dollar spent.

The same system can be applied to your own buying. And you can save a proportionate amount of money. How? Simply by consulting the advertising pages of the paper!

When you find yourself in need of anything—don't rush out and buy the first one offered you. Exercise the power of selection that the advertisements give you. Read about them—what they are like and will do, who makes it and what it costs. Then, when you find the one that best suits your pocket book and needs, buy it! In this way you'll be spending your money wisely. You'll know what you're getting and how much it costs—before you buy it.

Every advertisement is the bid of
some business firm for your trade; consider
them carefully before buying

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

The Gleichen baseball club is now in possession of \$100 of good Basano money as a result of a tournament between Gem, Comet, Gleichen and Basano. The score in the final game 1-6.

While attending the Calgary fair a platform fell about twenty feet and P. E. Pobst sustained a broken wrist and one rib, his wife a broken leg and his son's back was slightly injured. Several others were slightly hurt but these were the only persons taken to hospital. Two of Mr. Pobst's daughters were within a couple of feet of him but they escaped injury and came to Gleichen to look after the farm.

It is said a German was heard to remark in town that he was praying that it would not rain here at all this summer and it is also said a number of German school children have been heard to say they were praying it should not rain. An advertisement was made to secure evidence against the man but sufficient could not be obtained. If such is true it is a display of too much nerve altogether and a close watch is being kept now with a view to placing them where they belong.

F. L. Mallory has built an addition to his residence and generally renovated its interior.

Mrs. James Cameron and family have left to spend the warm weather in Vancouver.

Principal McKay and wife left to spend a couple of months at Edmonton.

Mrs. N. W. M. Millar, accompanied by her daughters, Mrs. Bell and Mrs. Parquharson, their families left to visit her former home in Idaho for a few weeks.

Mrs. Peter McLean and family have left to spend a couple of months at Vancouver. She was joined on the trip by her sister in law Mrs. R. A. Brown of Lethbridge.

Ex-Mayor C. J. Bray and wife autoed over from Travers Sunday and spent until Monday evening visiting Mr. and Mrs. F. K. McKay and other friends.

Mrs. J. J. Robinson and family have left to visit her former home at Pembroke, Ontario.

That one Canadian soldier to equal to three Huns has now been proven beyond doubt by one of our Gleichen boys Private Leadbeater is the boy who earned the distinction. He was in a raiding party when he got mixed up with three Germans killing all three and was wounded himself in the head, face and leg.

Sunday afternoon a good crowd gathered at the local diamond to witness the match between Gem and Gleichen and were not disappointed as it required eleven innings to determine the winner. Gleichen finally won 8-5. Gleichen players: Jack McArthur, Babe McArthur, Bob McArthur, S. Williams, Dr. McIntyre, M. Payne, Alford, Geo. Mace and Thayer.

A. E. Staback and his daughter arrived Sunday from Woodville, Ont., to visit his daughter, Mrs. Geo. W. Evans, and his son Bob. Mrs. Staback has accepted a position as teacher of the Shamrock school.

The roundup of sturgeon, some of the Bow river will be the only one made by the government this year. A lot of horses are being held at "Bessie's Blough" about two miles south of town.

Mrs. J. Ward arrived here last week from Crookston, Minn., to visit her brother W. Walsh. She was accompanied by Mr. Walsh's two daughters, Eleanor and Marion, who have been attending school at Crookston for the past year.

E. Poyindinkle arrived in town Monday from Missouri. He is seriously thinking of buying a farm here.

Mr. and Mrs. Forsyth, of Cluny have returned from a visit to the United States.

Vulcan defeated Gleichen in a baseball game Tuesday night 8-0. The visitors made five runs in the first inning.

GLEICHEN UNITED CHURCH

The regular evening service will be held at 7:30 p.m. Subject: "Identifying the Slacks." In the unjustified attack on the lives of thousands of helpless women and children in China and Spain and the democratic nations of the world hide behind the excuse that it is unchristian to use the sword! If positions were reversed would we not expect the people of other friendly countries to do what they could to help us? Does Christianity mean protecting ourselves when others are being destroyed.

ALBERTA CROP REPORT

(Continued from page one)
Minister of agriculture, suggests that a large portion of the drought area has excellent stands of wheat and

that coarse grains are making rapid growth with early sown fields of oats in the shot blade.

The weather has been generally favorable for rapid growth following a general rain over the province. Many crop districts also report heavy showers which covered wide areas. These general rains were very beneficial since heavily steeled crops require an abundance of moisture.

The northern portion of the province reports many fields are patchy. This may be due to poor moisture conditions during germination or damage from insects.

The department is still supplying poisoned bait in an effort to have as many grasshoppers destroyed as possible before the egg laying period. Fieldmen in charge of the hopper campaign report excellent control with poisoned bait. Cut worms are now reported in the pupa or chrysalis stage of development. Much less damage can now be expected.

Farmers have been busy cutting and stacking first crops of alfalfa and tame hay. The heavy rains have spoiled some early cuttings. The crop districts where irrigation is practiced reports exceptional stands of forage crops. Native grasses are being harvested with good yields. A large acreage of forage crop has been seeded since the general rain.

Most crop districts report pastures maintaining good growth, particularly in the areas where the heaviest rains have fallen. One crop reported in the drought area advises moisture in virgin soil to have penetrated four to eight inches, and in cultivated land where crops are growing, to have reached a depth of two to five feet.
